GENERAL AVIATION AIRPORT SNOW REMOVAL

Winter weather will soon be upon us. Here are reminders about how General Aviation areas will be cleared when the snow flies.

→ SLC crews will plow eastside taxiways and taxi-lanes after commercial runways, taxiways, and aprons are cleared.

→ Fixed Base Operators (FBOs) are required to clear their own aprons to the edge of their lease lines prior to airport crews plowing taxiways.

→ Taxiway A and the runway at South Valley Regional Airport (U42) will normally be cleared and deiced by 9:00 a.m. after a snow event and snow crews will work throughout the day to keep taxi-lanes and common ramps usable.

→ Tooele Valley Airport (TVY) usually receives much less snow (last winter, less than 8 inches were plowed). It will not be cleared until SLC crews complete snow removal operations at Salt Lake City International Airport.

→ Snow crews will normally clear snow from GA hangar fronts to within four feet of hangar entrances. Tenants are responsible to clear remaining snow.
